| <b>授業の内容</b>   |
| The study of sport tells us much about society where a sport is played. Understanding how sports are played gives you more profound knowledge about a given society. Japan has an unique character in terms of history and development of sport. Many sports were imported from the West in Meiji Period. On the contrary, some sports, such as Judo and Karate, were developed from traditional martial arts and are now played world-wide. How sports were transformed or modified in Japanese society would be a key to the better understanding of Japanese society. |
| <b>到達目標</b>  |
| At the end of this course, students should gain a insightful perspective on the relationship between sport and global society. Students also should have a profound knowledge of how global society influenced sport culture.  |
